## ANNEX IV

I. The basic equation expressing the equivalence of drawdowns on the one hand and repayments and charges on the other.

The basic equation, which establishes the annual percentage rate of charge (APR), equates, on an annual basis, the total present value of drawdowns on the one hand and the total present value of repayments and payments of charges on the other hand, i.e.:

$$\sum_{k=1}^m C_k (1 + X)^{-t_k} = \sum_{l=1}^{m'} D_l (1 + X)^{-s_l}$$

where:

— X	is the APR,
— m	is the number of the last drawdown,
— k	is the number of a drawdown, thus $1 \leq k \leq m$ ,
— C <sub>k</sub>	is the amount of drawdown k,
— t <sub>k</sub>	is the interval, expressed in years and fractions of a year, between the date of the first drawdown and the date of each subsequent drawdown, thus $t_1 = 0$ ,
— m'	is the number of the last repayment or payment of charges,
— l	is the number of a repayment or payment of charges,
— D <sub>l</sub>	is the amount of a repayment or payment of charges,
— s <sub>l</sub>	is the interval, expressed in years and fractions of a year, between the date of the first drawdown and the date of each repayment or payment of charges.

### Remarks

- (a) The amounts paid by both parties at different times shall not necessarily be equal and shall not necessarily be paid at equal intervals.
- (b) The starting date shall be that of the first drawdown.
- (c) Intervals between dates used in the calculations shall be expressed in years or in fractions of a year. A year is presumed to have 365 days (or 366 days for leap years), 52 weeks or 12 equal months. A month is presumed to have 30,41666 days (i.e.  $365/12$ ) regardless of whether or not it is a leap year.

Where intervals between dates used in the calculations cannot be expressed as a whole number of weeks, months or years, the intervals shall be expressed as a whole number of one of those periods in combination with a number of days. When using days:

- (i) every day shall be counted, including weekends and holidays;
  - (ii) equal periods and then days shall be counted backwards to the date of the initial drawdown;
  - (iii) the length of the period of days shall be obtained excluding the first day and including the last day and shall be expressed in years by dividing this period by the number of days (365 or 366) of the complete year counted backwards from the last day to the same day of the previous year.
- (d) The result of the calculation shall be expressed with an accuracy of at least one decimal place. If the figure at the following decimal place is greater than or equal to 5, the figure at that particular decimal place shall be increased by one.
- (e) The equation can be rewritten using a single sum and the concept of flows ( $A_k$ ), which will be positive or negative, in other words either paid or received during periods 1 to n, expressed in years, i.e.

$$S = \sum_{k=1}^n A_k (1 + X)^{-t_k}$$

where S is the present balance of flows. If the aim is to maintain the equivalence of flows, the value will be zero.

II. The additional assumptions for calculating the APR shall be as follows.

- (a) Where a credit agreement or an agreement for the provision of crowdfunding credit services gives the consumer freedom of drawdown, the total amount of credit shall be deemed to be drawn down immediately and in full.
- (b) Where a credit agreement or an agreement for the provision of crowdfunding credit services gives the consumer freedom of drawdown in general but imposes, amongst the different ways of drawing down, a limitation with regard to the amount of credit and period of time, the amount of credit shall be deemed to be drawn down on the earliest date fixed in the credit agreement or in the agreement for the provision of crowdfunding credit services and in accordance with those drawdown limits.
- (c) Where a credit agreement or an agreement for the provision of crowdfunding credit services provides different ways of drawing down with different charges or borrowing rates, the total amount of credit shall be deemed to be drawn down at the highest charge and borrowing rate applied to the most common drawdown mechanism for that type of credit agreement or agreement for the provision of crowdfunding credit services.
- (d) In the case of an overdraft facility, the total amount of credit shall be deemed to be drawn down in full and for the whole duration of the credit agreement. If the duration of the overdraft facility is not known, the APR shall be calculated on the assumption that the duration of the credit is three months.

(e) In the case of an open-end credit agreement or agreement for the provision of crowdfunding credit services, other than an overdraft facility, it shall be assumed that:

(i) the credit is provided for a period of one year starting from the date of the initial drawdown, and that the final payment made by the consumer clears the balance of capital, interest and other charges, if any;

(ii) the capital is repaid by the consumer in equal monthly payments, starting one month after the date of the initial drawdown. However, in cases where the capital must be repaid only in full in a single payment, within each payment period, successive drawdowns and repayments of the entire capital by the consumer shall be assumed to occur over the period of one year. Interest and other charges shall be applied in accordance with those drawdowns and repayments of capital and as set out in the credit agreement or in the agreement for the provision of crowdfunding credit services.

For the purposes of this point, an open-end credit agreement or agreement for the provision of crowdfunding credit services is a credit agreement or an agreement for the provision of crowdfunding credit services without a fixed duration and includes credits that must be repaid in full within or after a period but, once repaid, become available to be drawn down again.

(f) In the case of credit agreements or of agreements for the provision of crowdfunding credit services other than overdrafts and open-end credit agreements or agreement for the provision of crowdfunding credit services as referred to in the assumptions set out in points (d) and (e):

(i) where the date or amount of a repayment of capital to be made by the consumer cannot be ascertained, it shall be assumed that the repayment is made at the earliest date provided for in the credit agreement or in the agreement for the provision of crowdfunding credit services and is for the lowest amount for which the credit agreement or the agreement for the provision of crowdfunding credit services provide;

(ii) where the interval between the date of initial drawdown and the date of the first payment to be made by the consumer cannot be ascertained, it shall be assumed to be the shortest interval;

(g) Where the date or amount of a payment to be made by the consumer cannot be ascertained on the basis of the credit agreement or the agreement for the provision of crowdfunding credit services or the assumptions set out in points (d), (e) or (f), it shall be assumed that the payment is made in accordance with the dates and conditions required by the creditor or the provider of crowdfunding credit services and, when those dates and conditions are unknown:

(i) interest charges are paid together with the repayments of capital;

(ii) a non-interest charge expressed as a single sum is paid at the date of the conclusion of the credit agreement or the agreement for the provision of crowdfunding credit services;

(iii) non-interest charges expressed as several payments are paid at regular intervals, starting with the date of the first repayment of capital, and where the amount of such payments is not known they shall be assumed to be equal amounts;

(iv) the final payment clears the balance of capital, interest and other charges, if any.

- (h) Where the ceiling applicable to the credit has not yet been agreed, it is assumed to be EUR 1 500.
- (i) Where different borrowing rates and charges are offered for a limited period or amount, the borrowing rate and the charges shall be deemed to be the highest rate for the whole duration of the credit agreement or the agreement for the provision of crowdfunding credit services.
- (j) For consumer credit agreements or agreements for the provision of crowdfunding credit services for which a fixed borrowing rate is agreed for the initial period, at the end of which a new borrowing rate is determined and subsequently periodically adjusted according to an agreed indicator, the calculation of the APR shall be based on the assumption that, at the end of the fixed borrowing rate period, the borrowing rate is the same as at the time of calculating the APR, based on the value of the agreed indicator at that time.
